

~~ADMINISTRATIVE-INTERNAL USE ONLY~~

10 May 1977

MEMORANDUM FOR: Deputy Director of Security (PSI)

FROM:

Chief of Operations (PSI)

SUBJECT: Task Force Report

1. At the meeting of 9 May 1977 the Director of Security advised that he is extremely anxious to forward to the DDCI the Report of the Security Review Task Force Studying the Impact of the Cases. PPG will redraft a covering memorandum highlighting four major recommendations which have resource implications:

- a. Polygraph Programs
- b. Commo Staff Employees
- c. Physical Security Surveys
- d. Reinvestigation

2. Mr. Gambino initially was inclined to suggest that there will be a need for 50 slots, including positions required by the Office of Communications. After some extended discussion, he agreed to raise the figure to about 60. The Director of Security definitely wants to press for a personnel increase at this time, while the climate is right, rather than waiting for more detailed study.

3. Very preliminary and tentative ball park figures were:

- a. Commo - 30 positions
- b. Polygraph Branch - 6 professional positions
- c. Physical Security Division - 6 Survey Officers
- d. Washington Field Office - 8 investigative and
clerical positions
- e. Clearance Division - 2 RIP positions

~~ADMINISTRATIVE-INTERNAL USE ONLY~~

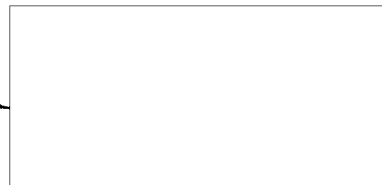

STAT 4. The PPG document should reflect the formal decision by the Director of Security. I have the distinct impression that Mr. Gambino will want to move very quickly after the trial to start negotiating for polygraphing at industrial firms. He has talked about using examiners already on board to kick off the program. Over to you, but I think it is not too early to start planning on:

a. How and where do we acquire the new examiners? Do you want to follow the existing procedures of bringing in examiners and training them?

b. Exactly what coverage will be provided? (I have the impression Mr. Gambino wants drug coverage, but not the complete EOD questions in other areas.)

c. How will the Polygraph Branch organize to handle the 1500-1800 new cases that may be involved? Will there be cover problems?
